**A.** CB Centre Back Length

**B.** Half Chest Measurement (take the measurement 2.5cm under the arm pit)

**C.** Waist

**D.** Inner Leg

1. Find an equivalent style garment that you currently wear and feel comfortable in.  
Note: if you are trying to work out your size for a polo shirt don't use a tee shirt or jacket, use a polo shirt.
2. Make sure it is not too tight or loose and that you are happy with the fit.
3. Lay the garment out flat and measure at the corresponding points shown above.
4. Look at the size guide on the relevant garment and choose the measurement that is the closest to yours. This will then tell you what size you are, based on the cut of the garments. If you are between sizes it's usually best to go for the larger option.

**Note: Please choose carefully because customised garments cannot be returned due to incorrect sizing.**
